**MESSAGE:**

Re: As per your request, please see attached amendment for application no. 10/664,343

1. (CURRENTLY AMENDED) A display device containing:

at least one poster which is provided with an optically transparent window having one of a variable window position, a variable window shape and a variable window size in the poster and presenting an external display outside said transparent window; and

at least one image-presenting device which presents an internal display that can be seen through said window in the poster;

wherein said display device includes adjustment means adapted for modifying at least one geometrical parameter selected from: (1) the position of the internal display relative to the poster ~~a fixed support, the poster~~ (2) the shape of the internal display, and (3) the size of the internal display to match the respective window position, shape or size;

and wherein said geometrical parameter used is such that the internal display is in register with the window in the poster being presented.
